XM Radio provides travelers a great service when crossing statelines. As a truckdriver, I am in need of current and accurate weather and traffic conditions to perform my job to the best of my ability. Most radio stations do not provide service outside of an area that would make driving safer. It is for this reason that I respectfully urge the FCC to reject the NAB's petition 04-160 and allow XM Radio to continue the programming they currently offer. Thank you.
